

Symptom survey

Is **ClariFix cryotherapy** right for you?

If your answer is yes to any of these questions, talk to your ENT doctor.

Do you experience these symptoms frequently or on a regular basis?

	Yes	No
Watery runny nose	<input type="checkbox"/>	<input type="checkbox"/>
Stuffy nose	<input type="checkbox"/>	<input type="checkbox"/>
Congestion in the morning	<input type="checkbox"/>	<input type="checkbox"/>
Post-nasal drip	<input type="checkbox"/>	<input type="checkbox"/>
Clearing of the throat	<input type="checkbox"/>	<input type="checkbox"/>

Frequently asked questions

When will I see an improvement?

Most patients begin to see improvement between two and six weeks post-treatment.

What does the treatment feel like?

You may experience slight pressure, a cooling sensation in the nose and/or around the molars, or some discomfort during and/or after the treatment.

What are the side effects?

The most common side effects associated with ClariFix cryotherapy are transient pain or discomfort, which typically resolves in 24 hours, and increased congestion, which may last five to seven days.*

Chronic rhinitis

Get your runny, stuffy nose to **cool it**

Drip. Sniff. Drip.

Are you one of the 24+ million Americans who suffers from chronic rhinitis?¹

stryker

What causes chronic rhinitis?

Out-of-balance nerves may be sending too many signals to your nose, telling it to drip, run and swell more than necessary.

Chronic rhinitis is frequent inflammation of the nose with symptoms such as:

Runny nose

Stuffy nose

Post-nasal drip

(mucus in the throat)

If treatments, such as nasal sprays, drops and pills are not working for you, or you are looking for a solution that lasts longer without the side effects of medications, it's time to try ClariFix cryotherapy.

“I couldn't focus on my work. My nose was constantly dripping. It was a horrible thing. My doctor gave me every pill, nose spray and shot, and nothing touched it. After cryotherapy with the ClariFix device, all my symptoms started to subside and within three weeks to a month, my symptoms were gone. I stopped sneezing, my nose stopped dripping, and I've had nothing but quality of life since.”

Actual ClariFix cryotherapy patient and three-year chronic rhinitis sufferer

The treatment and what you can expect

How does ClariFix cryotherapy work?

Using cold treatment called 'cryotherapy,' the ClariFix device reduces your runny, stuffy nose by interrupting the signals that out-of-balance nerves may be sending.

- Goes to the root of the problem: the inflamed nasal lining and underlying nerves
- Delivers cold temperatures to the out-of-balance nerves in the back of the nose
- Stops the source of the symptoms for lasting relief

Procedure overview

- 1 Normal nasal cavity**
Nasal nerves help regulate the nasal activity

- 2 Chronic rhinitis**
Out-of-balance nasal nerves may send too many signals, contributing to congestion and runny nose symptoms

- 3 ClariFix cryotherapy**
Nerve signals are interrupted to reduce congestion and runny nose symptoms

Get your life back with ClariFix cryotherapy

4 out of **5** patients reported long-lasting improvement after ClariFix cryotherapy.^{2,3}

Enjoy life without tissues

After ClariFix cryotherapy, patients report a reduction in runny and stuffy nose symptoms.^{2,3}

Minimal downtime

Most patients typically return to normal activity the same day.
